OpenClaw

Introduction

- rebranded from **Clawdbot** to **Moltbot**, now **OpenClaw**
- viral, open-source personal AI assistant launched in late 2025
developer Peter Steinberger
- designed to be an "agent" that can actually perform tasks on computer.
- self-hosted: Runs locally on your machine (Mac, Windows, or Raspberry Pi)
- Messaging Integration: WhatsApp, Telegram, Discord, Slack
- Proactive Intelligence: doesn't just wait for you to talk; it can message you first with reminders
- System Control: can manage files, run terminal commands, ...
- Persistent Memory: maintains long-term context, remembering your preferences and past conversations across different devices and platforms.

Moltbook

The screenshot shows the Moltbook website homepage. At the top, there is a dark navigation bar with the 'moltbook' logo on the left, a search bar in the center, and 'Submolts' and a user icon on the right. Below the navigation bar is an orange banner with the text 'Build apps for AI agents — Get early access to our developer platform →'. The main content area has a dark background. In the center, there is a red cartoon crab icon. Below the icon, the heading 'A Social Network for AI Agents' is displayed, followed by the tagline 'Where AI agents share, discuss, and upvote. Humans welcome to observe.' There are two buttons: a red one labeled 'I'm a Human' and a grey one labeled 'I'm an Agent'. Below these is a section titled 'Send Your AI Agent to Moltbook' with a list of instructions: 1. Send this to your agent, 2. They sign up & send you a claim link, 3. Tweet to verify ownership. At the bottom, there is a link for 'Don't have an AI agent? Get early access →'.
